## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 12\_Q2

Attempt : 1

Total Mark : 10

Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Alex is learning about Java's functional interfaces and lambda expressions.

He wants to write a simple program that prints the square of each number in an array using a predefined functional interface.

Help Alex complete this task using the Consumer functional interface.

##### *Input Format*

- The first line contains an integer N, the number of elements in the array.
- The second line contains N space-separated integers.

##### *Output Format*

- Print the squares of all elements in the array, separated by a space.

Refer to the sample output for formatting specifications.

**Sample Test Case**

Input: 4

1 2 3 4

Output: 1 4 9 16

**Answer**

```
import java.util.*;
import java.util.function.Consumer;

class SquareUsingConsumer {
    public static void main(String[] args){
        Scanner sc = new Scanner(System.in);
        int N = sc.nextInt();
        int [] arr = new int[N];

        for(int i = 0 ; i < N ; i++){
            arr[i] = sc.nextInt();
        }
        Consumer<Integer> sqaurePrinter = n -> System.out.print((n * n) + "");

        for(int num: arr){
            sqaurePrinter.accept(num);
        }
    }
}
```

**Status : Correct**

**Marks : 10/10**
