## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 3\_Q4

Attempt : 1

Total Mark : 10

Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Sesha is developing a weather monitoring system for a region with multiple weather stations. Each weather station collects temperature data hourly and stores it in a 2D array.

Write a program that can add the temperature data from two different weather stations to create a combined temperature record for the region.

##### *Input Format*

The first line of input consists of two space-separated integers N and M, representing the number of rows and columns of the matrices, respectively.

The next N lines consist of M space-separated integers, representing the values of the first matrix.

The following N lines consist of M space-separated integers, representing the values of the second matrix.

### ***Output Format***

The output prints the addition of the two matrices in N rows and M columns, representing the combined temperature record.

Refer to the sample output for formatting specifications.

### ***Sample Test Case***

Input: 3 3

1 2 3

4 5 6

7 8 9

1 1 1

2 2 2

3 3 3

Output: 2 3 4

6 7 8

10 11 12

### ***Answer***

```
import java.util.Scanner;
```

```
class Matrix {  
    public static void main(String[] args) {  
        Scanner sc = new Scanner(System.in);  
        int N = sc.nextInt();  
        int M = sc.nextInt();  
        int[][] a = new int[N][M];  
        int[][] b = new int[N][M];  
        int[][] sum = new int[N][M];  
        for (int i = 0; i < N; i++) {  
            for (int j = 0; j < M; j++) {  
                a[i][j] = sc.nextInt();  
            }  
        }  
        for (int i = 0; i < N; i++) {  
            for (int j = 0; j < M; j++) {  
                b[i][j] = sc.nextInt();  
            }  
        }  
        for (int i = 0; i < N; i++) {  
            for (int j = 0; j < M; j++) {  
                sum[i][j] = a[i][j] + b[i][j];  
            }  
        }  
        for (int i = 0; i < N; i++) {  
            for (int j = 0; j < M; j++) {  
                System.out.print(sum[i][j] + " ");  
            }  
            System.out.println();  
        }  
    }  
}
```

```
        b[i][j] = sc.nextInt();
    }
}
for (int i = 0; i < N; i++) {
    for (int j = 0; j < M; j++) {
        sum[i][j] = a[i][j] + b[i][j];
        System.out.print(sum[i][j] + " ");
    }
    System.out.println();
}
}
```

**Status :** Correct

**Marks :** 10/10
